Safe Drinking Water Monitor Program—Charlene Campbell-Wood

How much water should I have for an emergency and how should I store it safely?

- At least four litres of water per person per day - for drinking, food preparation, personal hygiene and dishwashing.
- Store bottled water in a cool, dark place, in washed and disinfected plastic bottles that are easy to carry.
- Record the date that you bottled or stored the water on the label. Replace stored water every six months and store-bought bottled water every year.
- If you have pets or a service animal, don't forget to store approximately 30 millilitres of water per kilogram of the animal's weight per day. For example an average cat or small dog would require at least 1/5 of a litre (or half a cup) of water per day.

For more information please refer to the Canadian Guidelines for Safe Drinking Water or www.hc-sc.ca
