***Through an Aboriginal Lens***

The intergenerational effects of our colonial history, Indian Residential Schools, particularly, are broad. Today, we have disproportionate numbers of Indigenous peoples impacted by physical and mental health traumas and who have criminal justice encounters. Samaya Jardey, Program Manager, Through an Aboriginal Lens, will speak to the work Through an Aboriginal Lens does with Indigenous youth who are experiencing intersecting health and justice related challenges.

Through an Aboriginal Lens is a partnership between the Native Courtworker and Counselling Association of BC and the Asante Centre. This first of its kind project in BC provides holistic outreach support to Indigenous youth referred to the Youth Justice FASD Program. The approach to the work is through an Indigenous cultural lens that is deeply rooted in and respectful of Indigenous worldviews, values and teachings.

Samaya was the first ever student co-ordinator of Musqueam 101. She is looking forward to seeing everyone and we are looking forward to welcoming her back!

**Presenter:**

Samaya Jardey – For more than twenty years she worked directly with former students of Indian Residential School (IRS), and their families. Based on her grandmother's teachings, her guidance and support are holistic in nature and rooted in an Indigenous worldview, values and teachings.

**Special Guest:**

Tiffany Gallagher – Tiffany was the first note taker and recorder of Musqueam 101. She is looking forward to seeing everyone and we are looking forward to welcoming her back as well!

## Safe Drinking Water Monitor Program

Charlene Campbell-Wood

Adapted from Nova Scotia's The Drop on Water fact sheets

### FACTS ON DRINKING WATER

#### Coliform Bacteria – Total Coliforms & E.Coli

- ⇒ Total coliforms are a group of bacteria commonly found in the environment, for example in soil or vegetation, as well as the intestines of mammals, including humans.
- ⇒ Total coliform bacteria are not likely to cause illness, but their presence indicates that your water supply may be vulnerable to contamination by more harmful microorganisms.
- ⇒ Escherichia coli (E.coli) is the only member of the total coliform group of bacteria that is found only in the intestines of mammals, including humans.
- ⇒ The presence of E.coli in water indicates recent fecal contamination and may indicate the possible presence of disease-causing pathogens, such as bacteria, viruses, and parasites.
- ⇒ Although most strains of E.coli bacteria are harmless, certain strains, such as E.coli 0157:H7, may cause illness.

**WALK WITH US  
TO FIND THE CURE  
FOR DIABETES**

**MARCHEZ AVEC NOUS  
POUR TROUVER UNE  
GUÉRISON AU DIABÈTE**

To participate in a 5K walk has been on my bucket list for some time now.  
I am a type 2 diabetic so I thought, why not a walk for diabetes!

Let me share a bit about my experience

It was on May 6, 2010 when I was first diagnosed with diabetes. I woke up really dizzy, confused and felt like I was intoxicated, and I found myself struggling to find balance. I said to myself "This is not right and I don't feel right". I managed to get myself outside; I was feeling really out of sorts and really scared. I called for an ambulance. In no time they were at my house, I remember the fireman taking my vitals and asking questions. I can remember telling him, I need a drink of water, I am very thirsty. Then the ambulance attendants took over, they took my blood sugar level and it was at 46. They told me that I should have been in a diabetic coma at this level. I was admitted into the hospital for ten days. It was not easy to get this chronic disease in control.

Some days I look ok but on the inside I feel like hell.

My goal is to be in control and to tick one more thing off my bucket list.

This is my story and I hope this will inspire others to understand my every day battle with this chronic illness.

From: Weeze Point

You are welcome to join me on the "Walk for Diabetes"

I have committed to raising \$1,000.00  
and would love any or all support offered.
